

Aventyn® CLIP®Care Clinical Information Management Solution for Healthcare joins the Intel AppUpSM Small Business Service

Cloud-based Solution Enables Hospitals, Physician Offices, University Medical Centers to manage Patient Health Records, Track Assets, Capture Charges and Electronic Prescription Orders

mHealthSummit, Washington DC, and Bangalore, India – December 06, 2011 – [Aventyn Inc.](#), an innovative provider of secure connected clinical information processing solutions, today announced the **CLIP®Care** Cloud solution for hospitals and patient point-of-care. Aventyn's CLIP®Care Cloud solution is now available as part of the Intel AppUp Small Business Service. This announcement came as Aventyn Inc. exhibits at the 2011 mHealth Summit, organized by the Foundation for the National Institutes of Health in partnership with the mHealth Alliance and the National Institutes of Health (NIH).

Healthcare providers benefit tremendously with Aventyn® CLIP®Care cloud solution, as part of the Intel AppUp Small Business Service catalog, by offering seamless integration of mobile health applications that leverage the cloud as the software delivery mechanism while allowing the data to be saved locally on site, enabling the service providers to support physician practices, home care providers and remote monitoring of patients for improved healthcare delivery efficiency and quality.

Extending upon the successful CLIP® Clinical Information Processing Platform, CLIP®Care Cloud solutions, with integrated RFID capability, allow clinicians and healthcare providers to connect patients and related medical assets, document clinical care, manage medication and billing across the healthcare continuum, using a unified and transparent web-based platform.

CLIP®Care features includes:

- Cloud-based, remote secure log-in capability
- Portable electronic medical health record
- Clinical, financial and document management
- ePrescription and ePedigree applications
- Remotely locate, identify and monitor correct patients and assets
- Telemedicine for remote monitoring of patients

"Clinical information systems based upon the Intel AppUp Small Business Service delivered on the Intel Hybrid Cloud platform are precisely the kind of health IT solutions that providers are benefiting from by improving healthcare delivery and patient safety," said Navin Govind, Founder and Chief Executive Officer of Aventyn Inc. "A simple, flexible and cost effective solution that can scale and be instantly available is now a reality for delivering effective health care"

"Intel AppUp Small Business Service catalog is expanding with new, innovative solutions for Healthcare, like Aventyn's CLIP® Care Cloud solution for patient point-of-care," said Bridget Karlin, General Manager, Intel Hybrid Cloud. "Intel is excited to be working with Aventyn to extend the

benefits of the pay-as-you-go subscription model and the confidence of securely saving the healthcare data on the physician's on-premises server with their solution. The goal is to provide medical practice customers a better user experience. By offering our reseller partners new and innovative solutions, such as Aventyn CLIP® Care, via our Intel AppUpSM Small Business Service, medical practices now have access to the first cloud offering with integrated RFID for patient identification, asset management, and medical banking allowing them to grow their business in a more cost effective and flexible model.”

CLIP®Care Cloud transparently delivers a standards-based solution that is built on the cornerstones of interoperability, security, scalability and high-availability eliminating the need for several proprietary applications. Clinicians, health care providers and IT administrators now have a simple, flexible, cost effective connected health information management solution that is easy to deploy, quickly and reliably.

Pricing and Availability

CLIP®Care Cloud is available for subscription today in North America and India. Pricing varies by region and includes promotions for certain qualified nonprofit organizations, universities and government entities. Please visit www.aventyn.com to schedule demos.
