

Aventyn® Offers CLIP®CareONE Solution for Hospitals and CLIP®CarePOINT Solution for Patient Point-of-care

New Web-based Products Enable Hospitals, Physician Offices, University Medical Centers to Manage Patient Health Records, Track Assets, Capture Charges and Electronic Prescription Orders.

Carlsbad, California and Bangalore, India – October 21, 2007 – Aventyn Inc., an innovative provider of healthcare connected clinical information processing solutions, today announced its latest offerings, CLIP®CareONE solution for hospitals and CLIP®CarePOINT solution for patient point-of-care. Aventyn announced the availability of their new modular solutions at the World of Health IT Conference (www.worldofhealthit.org) in Vienna, Austria. The two new solutions announced greatly benefit hospitals; seamless integration of the healthcare IT environments of physician practices, home care providers, hospices and clinical researchers and dramatically improves healthcare delivery efficiency and quality.

Extending upon the successful CLIP® Clinical Information Processing Platform, CLIP®CareONE and CLIP®CarePOINT solutions with integrated RFID capability allow clinicians and healthcare providers to connect patients and related medical assets, document clinical care, manage medication and billing across the healthcare continuum, using a unified web-based platform.

CLIP®CareONE enterprise-level suite includes:

- Web-based, remote and local host secure log-in capability
- Portable ambulatory electronic medical health record
- Clinical, financial and document management
- ePrescription and ePedigree applications
- Remotely locate, identify and monitor correct patient and assets
- Health information management

CLIP®CarePOINT patient point-of-care suite includes:

- Point-of-care electronic patient management and care delivery
- Seamless patient administration from admission to discharge
- Capture and share patient-centric daily clinical information securely
- Telemedicine for monitoring patient well-being
- Patient registration, scheduling and calendaring

“Modular web-based clinical information solutions are the fastest growing health IT solutions providing clinicians and healthcare providers the best tools available to improve healthcare delivery and patient safety,” says Alexander Eriksson, managing director of Aventyn, Northern Europe.

"Aventyn solutions for hospitals and patient point of care provide a rich technology platform for research and education needs that will help improve patient safety and optimize healthcare delivery work-flows," said Martin Eriksson, senior researcher at Kungliga Tekniska Högskolan, KTH School of Technology and Health in Stockholm, Sweden. KTH works in close collaboration with Karolinska Institute utilizing technology across the borders of engineering and medicine, including technical research of importance to medical applications and health care in a broader context.

CLIP®CareONE and CLIP®CarePOINT deliver a standards-based solution that is built on the cornerstones of interoperability, security, scalability and high-availability eliminating the need for several proprietary applications. Clinicians, health care providers and IT administrators now have a simple, flexible, cost effective connected health information management solution that is easy to deploy, quickly and reliably.

Pricing and Availability

CLIP®CareONE and CLIP®CarePOINT are globally available for deployment and integration today in North and South America; Europe, Middle East and Africa, South East Asia and Australia. Pricing varies based on regional currencies. Certain qualified nonprofit organizations, universities and government entities are eligible for promotional pricing. Please visit www.aventyn.com to schedule demos, deployment and integration.

About Aventyn Inc.
